[SDG 12] Responsible Consumption and production 責任消費與生產

[12.2.1] Does your university as a body have a policy on ethical sourcing of food and supplies?

National Chin-Yi University of Technology (NCUT) is dedicated to promoting environmental sustainability and aligning with the government's green procurement policy. As part of our commitment to responsible procurement practices, NCUT departments prioritize products bearing environmental protection, energy-saving, and water-saving labels. This initiative has led to remarkable achievements, with NCUT consistently achieving a high green procurement ratio and receiving recognition from the Ministry of Education for its exceptional commitment to green procurement.

Procurement from Sheltered Workshops

NCUT also implements the “Regulations for Preferential Procurement of Products and Services Produced by Physical and Mental Disability Welfare Organizations or Sheltered Workshops.” This policy supports disadvantaged individuals, particularly those with physical and mental disabilities, by prioritizing these organizations in procurement projects. In 2022 and 2023, NCUT purchased NT\$1,919,224 worth of products and services from these welfare organizations and sheltered workshops, reflecting its commitment to social responsibility.

Green Procurement

In alignment with its commitment to environmentally friendly green energy technologies, NCUT emphasizes the importance of green procurement. To formalize this commitment, NCUT has established the "National Chin-Yi University of Technology Green Procurement Operation Management Points," which prioritize the purchase of energy-saving and water-saving products

bearing environmentally friendly labels. From 2009 to 2022, NCUT consistently achieved a green procurement ratio of over 95%, earning recognition from the Ministry of Education as an outstanding school in 2014.

Ethical Procurement Standards

Ethical procurement integrates food cultivation and processing with environmental and social management. It advocates for transparent and ethical practices, focusing on the welfare of individuals involved in the food supply chain and ensuring that food is produced and processed with respect for the environment and consumer health. This system is increasingly sought after by conscientious consumers who demand higher standards of social and environmental responsibility.

Energy-Efficient Electrical Equipment

NCUT has been proactive in promoting energy-efficient practices and equipment on campus. With the signing of the “Energy Policy” by President Dr. Chen Wenyuan, the university upholds a philosophy of environmental protection, energy saving, and low carbon emissions. Committed to complying with government energy regulations, NCUT aims to reduce energy consumption, implement energy management systems, and decrease greenhouse gas emissions. By continuously improving these efforts and promoting awareness among all staff and students, NCUT strives to maintain a low-carbon campus through energy-saving equipment updates.

The **Green Store system**, introduced in April 2008, aims to promote eco-labeled products and foster green consumerism among the general public in Taiwan. Today, there are over 10,000 Green Stores nationwide, with a growing presence in both physical and virtual spaces. By 2013, internet-based retailers could apply to become virtual Green Stores as well, broadening access to eco-friendly products.

Green Stores are categorized into **chain stores** and **community stores**, both of which must fulfill several requirements to promote green products:

Green Store Requirements:

1. **Introduction and management of green products:** Green Stores must offer an array of eco-friendly products, displayed attractively to encourage green consumerism.
2. **Green sales strategy:** Stores are required to integrate eco-friendly concepts into their sales strategies, ensuring that consumers are provided with information on green products and their benefits.
3. **Environmental and public health management:** Green Stores must use environmentally friendly or recyclable materials in packaging and adopt practices that support sustainability.
4. **Advocacy of green consumerism:** Stores should continuously provide consumers with

information regarding eco-friendly products and promote the importance of green consumerism.

5. **Participation in eco-friendly activities:** Beyond selling green products, Green Stores are expected to engage in eco-friendly promotional activities.
6. **Recycling resources:** Green Stores are required to set up a recycling area with clear signage and educational information to promote the recycling of materials.

Application Process:

Retailers wishing to apply to become Green Stores must register with the **Ministry of Economic Affairs** and meet several key indicators before applying:

1. **Validation of green products:** Ensure that products meet eco-friendly standards as listed on the Green-living Information Platform, including products with the **Green Mark** or **Carbon Footprint Label**.
2. **Highlight green products:** Use stickers or signs to clearly label eco-friendly products.
3. **Proper labeling:** Confirm that all green products are correctly labeled with eco-certification.
4. **Virtual Green Stores:** For online stores, applicants must create a dedicated section for green products on their website, including catalogs, multimedia information, or post-ordering leaflets to guide customers toward eco-friendly choices.

This initiative actively encourages retailers to support sustainable practices and educates consumers on making environmentally responsible purchasing decisions.

113年指定採購項目一覽表.pdf 附件2.國立勤益科技大學「無法採購環保(節能、...

各位老師、同仁大家好：

1. 依環境部訂定113年度綠色採購比率目標為95%，本校去(112)年綠色採購比率為100%，非常感謝各位師長之配合。
2. 為配合環境部「113年度機關綠色採購績效評核」作業規定，請各單位採購「指定採購項目」(1-48項)所列項目時，請優先選用具環保標章產品(如附件1)。
3. 請各單位配合綠色採購管制措如下：
 - (1)若各單位、系(所)於政府電子採購網(集中採購)購買「指定採購項目」(1-48項)所列項目時，請選用具環保標章產品，無環保標章產品不得下訂。
 - (2)若因單位需求欲選購「非環保標章產品」時，請改由其他採購方式進行採購，勿由政府電子採購網(集中採購)下訂，並檢附「無法採購環保(節能、省水)標章產品」理由書。
 - (3)「無法採購環保(節能、省水)標章產品」理由書，請務必於請購「前」依下列程序辦理：
 - A. 至「淨零綠生活」網站「首頁/綠生活選擇/環保產品查詢」，鍵入關鍵字查詢，確無此產品環保標章證號時，請先按「匯出PDF」後再列印畫面以為佐證。
 - B. 填寫「無法採購環保(節能、省水)標章產品」(如附件2)敘明理由。
 - C. 將本理由書簽會環境保護及安全衛生中心，陳請校長核示，奉核後始得購買(不論採購金額)。
4. 請各單位辦理工程及勞務採購涉及綠色採購項目時，要求承攬廠商於計畫執行過程中，積極實施綠色採購，並由承攬廠商至「民間企業及團體綠色採購申報平臺」申報綠色採購金額。
5. 如有相關問題請隨時與本中心聯絡，校內分機：2576~9。
